RADIUS REPORT FOR

1, 3, and 5 miles around 14251 S TAMIAMI TRAIL, NORTH PORT FL USA

PREPARED FOR: Matthew Rikman DATE: October 24, 2023

MAP

1, 3, and 5 miles around 14251 S TAMIAMI TRAIL, NORTH PORT FL USA

CITY North Port **COUNTY Sarasota**

How many people live here?

1 MI 7K 3 MI

5 MI

34K

65K

CITY: **74K**

COUNTY: 429K

How much money do they make?

1 MI \$51K

3 MI **\$57**K 5 MI **\$61**K

CITY: **\$69K**

COUNTY: \$69K

median household income

How old are they?

1 MI **57** 3 MI **56** 5 MI **53**

CITY: **49**

COUNTY: 57

median age in years

METHODOLOGY

First, we subtract the 2021 US Census Bureau's water areas from the 2021 block groups. Then we calculate the project's radiuses, the block groups minus water areas that intersect the radiuses, and the percent of each block group's area that's in the radiuses (overlap). Next, the overlap percent is multiplied by the Census demographics for each block group. Finally, we sum the overlap times the demographics for all block groups that intersect a radius to produce the demographic estimate for the radius.

The benefits of this methodology are that it allows for:

- 1. the use of the most current data for small area geographies from the US Census Bureau;
- 2. the estimation of demographics for radius distances using dissimilar shaped Census block groups;
- 3. data comparability (because estimates for small radiuses and large radiuses use the same methodology, geographies and datasets); and
- 4. improved estimates along coastlines and large water bodies by removing water areas.

This methodology assumes that the population is equally distributed throughout a block group. This assumption can result in unlikely estimates for small radiuses (i.e. 1 mile) in rural areas with low population densities and thus, large geographic area block groups.
