

PREPARED FOR: Matthew Rikman
DATE: October 24, 2023

A detailed map of Merritt Island, Florida, and its surrounding areas. The map shows the Indian River Lagoon to the east and south. Major roads include US Highway 1 running north-south, and US Highway 528 running east-west. Other roads shown are US Highway 95, US Highway 524, and various local roads like Cocoa Blvd, Dixon Blvd, and E Merritt Ave. Key locations marked include Sharpes, Indianola, Cocoa, Rockledge, and Angel City. A blue pin is placed in the Indianola area. Concentric orange circles are drawn around the pin, representing different distances. The map also shows the Eastern Florida State College - Cocoa Campus and the Ulumay Sanctuary. The map is credited to Mapbox and OpenStreetMap.

METHODOLOGY

First, we subtract the 2021 US Census Bureau's water areas from the 2021 block groups. Then we calculate the project's radiuses, the block groups minus water areas that intersect the radiuses, and the percent of each block group's area that's in the radiuses (overlap). Next, the overlap percent is multiplied by the Census demographics for each block group. Finally, we sum the overlap times the demographics for all block groups that intersect a radius to produce the demographic estimate for the radius.

The benefits of this methodology are that it allows for:

1. the use of the **most current data** for small area geographies from the US Census Bureau;
2. the estimation of demographics for radius distances using dissimilar shaped Census block groups;
3. **data comparability** (because estimates for small radiuses and large radiuses use the same methodology, geographies and datasets); and
4. improved estimates along coastlines and large water bodies by removing water areas.

This methodology assumes that the **population is equally distributed** throughout a block group. This assumption can result in unlikely estimates for small radiuses (i.e. 1 mile) in rural areas with low population densities and thus, large geographic area block groups.
